The VOSCH Recycling Sorting grapples are, despite of their low weights, exceptionally strong and robust due the patented grapple kinematics and the use of the highest steel qualities. The torque is matchlessly high because of the special turntable with up to 4 rotation motors.

These grapples are perfect for all areas of recycling. Ideal for wood and waste handling or any other types of sorting jobs. In demolition work, beams and building materials can be easily grabbed und clasped.

Equipped with one of our VOSCH saw units this sorting grapple transforms into a perfect saw grapple for tree nursing, whole tree felling, multi stemming or direct lengthening during chipper feeding and stacking.

Saw unit - SU HD 3/4"

A saw unit with low speed and high torque for professional use as a saw grapple. With heavy duty saw casing and available with 3/4" pitch saw chain.

Sennebogen System

A complete saw system with boom kinematic, designed for the Sennebogen 718E mobile timber handler with telescopic boom.

Saw motor displacement	30 cc
Pressure	250 bar
Flow	160 l/min
Hydraulic connection	P>T + drain
Chain lubrication	automatic
Saw chain	3/4" pitch
Chain tensioning	semi-automatic
Saw bar	33" (83 cm) 40" (101 cm)
Weight	33" (190 kg) 40" (205 kg)
